Ask & refine

Question the findings, or edit the report inline.

Why is the SMB segment less excited than enterprise?

SMB agents anchored on cheaper competitors and flagged that price is not visible until the third screen. Enterprise agents weighted SSO and seat-based pricing more heavily, which v2 addresses directly.

-

Product-Market-Fit Report

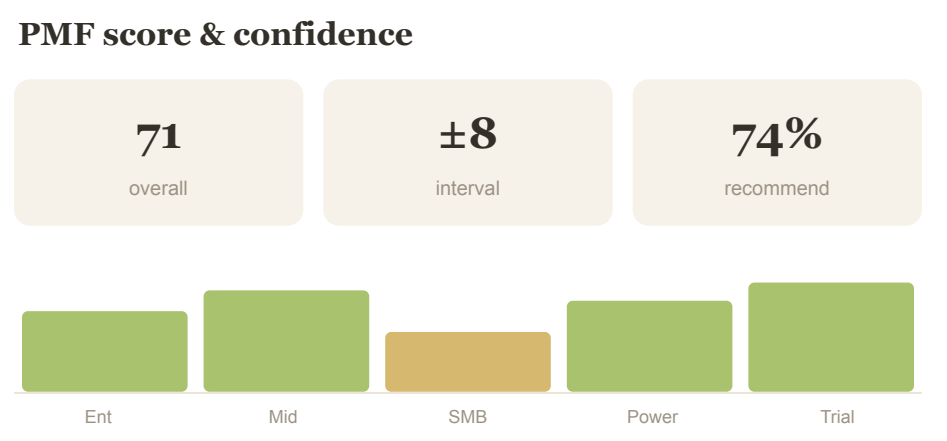

Pricing page v2 · June 2026 · Acme

71

PMF · ±8

Executive summary

Pricing page v2 reaches a strong PMF score of 71 (±8), an improvement of 6 points over v1. Enterprise and power-user segments respond enthusiastically to clearer tiers and seat-based pricing, while SMB enthusiasm lags on price perception.

- Key objections
1. Price not visible upfront — raised by 38% of agents, concentrated in SMB.

2. Tier differences unclear — mid-market agents wanted a comparison.

3. Trust / social proof — enterprise wanted security and references.

Methodology & data fidelity

Findings are grounded in 252 matched users across Posthog, Zendesk and Intercom
